## Subject Index

- 1.68 eV center  
Study of color centers in hot-filament CVD diamond films by cathodoluminescence and photoluminescence and their correlations with film quality, 1236
- <111> diamond  
Relaxation of Ga and H on a <111> diamond surface, 1473
- a-SiC:H films  
The effects of process pressure and microwave power on the properties of boron-doped SiC:H films prepared using the ECR-CVD technique, 1371
- a-C:H  
Nitrogenated amorphous carbon as a semiconductor, 401  
Electron affinity of carbon systems, 797  
Adhesion and structural changes of multi-layered and multi-doped a-C:H films during annealing, 932
- a-C:H:N  
Nitrogenated amorphous carbon as a semiconductor, 401
- a-C:H film  
Laser-assisted ECR-plasma-CVD of a-C:H films, 420  
Deposition of a-C:H films from argon/cyclohexane plasma on polymer substrates, 429
- a-DLC  
Metal contacts and electrical processes in amorphous diamond-like carbon films, 1275  
Study of photoconductivity in thin amorphous diamond-like carbon (a-DLC) films prepared by r.f. glow discharge technique, 1414
- Absorption  
Spatial distribution of impurity defects in synthetic diamonds obtained by the BARS technology, 1113
- ac conductivity  
Metal contacts and electrical processes in amorphous diamond-like carbon films, 1275
- Activated species  
Enhancement of diamond nucleation on alumina substrates by the activated species transport method, 1096
- Adhesion  
Adhesion of amorphous diamond-like film on sputtered hardmetal (WC-Co) cutting tools, 186  
The effect of biological fluids on the response of DLC films to a novel erosion durability test, 410  
Mechanical properties and Raman spectra of a-C:H and a-C:H:N coatings, 466  
Investigation of stress and adhesion of cubic boron nitride films, 508  
C:N and C:N:O films: preparation and properties, 570  
The newdiamond-coated carbide cutting tools, 617  
The properties of carbon layers deposited onto titanium substrates, 998  
The modelling of adhesion in multilayer films with layers of diamond-like and related materials, 1127  
Preparation of cubic boron nitride films by reactive sputtering from a boron carbide target, 1130  
Effect of different a-C:H films on the fretting behavior of bearing steel, 1143
- Adhesion of CVD diamond films on silicon substrates of different crystallographic orientations, 1402  
Characterization of d.c.jet CVD diamond films on molybdenum, 1462
- Adsorption on diamond  
Dopant incorporation mechanisms during the growth of thin film diamond, 378
- AES  
The deposition of aluminum nitride on silicon by plasma-enhanced metal-organic chemical vapour deposition, 1210
- Alloy solvents  
Nucleation and growth of diamond using Ni-Ti, Ni-Nb and Fe-B alloy as solvents, 38
- Aluminum nitride  
The deposition of aluminum nitride on silicon by plasma-enhanced metal-organic chemical vapour deposition, 1210
- Ammonia  
Investigation of the addition of nitrogen-containing gases to a hot filament diamond chemical vapour deposition reactor, 354
- Amorphous c-BN  
Fabrication and properties of Mo contacts to amorphous cubic boron nitride (a-cBN) layers, 1017
- Amorphous carbon  
Hydrogen-free amorphous carbon films: correlation between growth conditions and properties, 388  
Studies by electron paramagnetic resonance experiments of defects in hydrogenated amorphous carbon films as a function of annealing, 439  
Influence of the hydrogen evolution on the structural and electronic properties of a-C:H films, 453  
Mechanical and physical properties of amorphous carbon-based alloys, 461  
The properties of carbon layers deposited onto titanium substrates, 998  
Correlation of Raman spectra with the diamond-like properties of amorphous hydrogen-free carbon films prepared by a pulsed arc discharge method, 1355  
Effect of the substrate temperature on the physical characteristics of amorphous carbon films deposited by d.c. magnetron sputtering, 1509
- Amorphous carbon-nitrogen films  
Hard amorphous hydrogenated carbon-nitrogen films obtained by PECVD in methane-ammonia atmospheres, 471
- Amorphous carbon films  
Morphology and structural characterization of plasma-assisted prepared carbon films, 968
- Amorphous diamond  
Structure and chemical bonding in amorphous diamond, 175
- Amorphous diamond-like film  
Adhesion of amorphous diamond-like film on sputtered hardmetal (WC-Co) cutting tools, 186
- Amorphous hydrogenated carbon  
Photoluminescence mechanism in amorphous hydrogenated carbon, 457
- Amorphous hydrogenated carbon coating  
Thickness measurement of light elemental films, 1444

- Angle**  
Planarization of diamond thin film surfaces by ion beam etching at grazing incidence angle, 835
- Annealing**  
Oxygen impurities at the homoepitaxially grown diamond-substrate interface analyzed by secondary ion mass spectrometry, 34  
Annealing of ion beam amorphized diamond surfaces studied by in situ electron spectroscopy, 76  
Influence of the hydrogen evolution on the structural and electronic properties of a-C:H films, 453
- Ar + C plasma**  
Friction and wear properties of smooth diamond films grown in fullerene + argon plasmas, 923
- Arc jet**  
Evidence of supersonic flow in an arc-heated diamond film deposition reactor, 134
- Atomic force microscopy**  
AFM study on the non-monotonic texture evolution of heteroepitaxially nucleated diamond films, 266  
Mechanism of diamond formation on substrates abraded with a mixture of diamond and metal powders, 286  
Properties of diamond like carbon thin film coatings on stainless steel medical guidewires, 486  
Atomic force microscopy observation of the first stages of diamond growth on silicon, 592
- Atomic hydrogen**  
Growth of diamond and nickel carbide crystals in the Ni-C-H system, 93  
Evolution of the deposited carbon during diamond thin film synthesis evidenced by in-situ optical studies, 247  
Two-dimensional simulation of a hot-filament chemical vapor deposition reactor, 888  
Optical emission diagnostics and film growth during microwave-plasma-assisted diamond CVD, 1171  
On the pressure limits of diamond chemical vapor deposition, 1503
- Atomic structure**  
Structure and chemical bonding in amorphous diamond, 175  
Electron energy loss spectroscopy of amorphous carbon nitride, 560
- Atom sources**  
Twin atom source reactor for studies of diamond film growth, 281
- B- and P-doping**  
Characterization of doped and undoped CVD-diamond films by cathodoluminescence, 585
- Bias pre-treatment**  
Diamond growth during bias pre-treatment in the microwave CVD of diamond, 321
- Bias treatment**  
The cause of suppression of the diamond nucleation density, 25
- Biomaterials**  
The effect of biological fluids on the response of DLC films to a novel erosion durability test, 410  
The properties of carbon layers deposited onto titanium substrates, 998  
Influence of carbon coatings origin on the properties important for biomedical application, 1185
- Biomedical applications**  
The properties of carbon layers deposited onto titanium substrates, 998
- Blue LED**  
III-V nitride-based light-emitting diodes, 496
- BN films**  
Preparation of Si-N-B films by CVD techniques: effect of SiH addition to BH and NH gas mixtures, 580
- Bonded hydrogen**  
Thermal desorption study of bonded hydrogen in diamond films, 121
- Boron dichloride**  
Dopant incorporation mechanisms during the growth of thin film diamond, 378
- Boron doping**  
Dopant incorporation mechanisms during the growth of thin film diamond, 378  
Conduction mechanisms in boron implanted diamond films, 752  
The effects of process pressure and microwave power on the properties of boron-doped SiC:H films prepared using the ECR-CVD technique, 1371
- Boron nitride**  
Deposition mechanism of cubic boron nitride, 519  
Correlation between microstructure and collisional effects in cubic boron nitride synthesized using IBAD, 530  
Growth of boron nitride thin films by tuned substrate RF magnetron sputtering, 535  
Spectroscopic ellipsometric study of boron nitride thin films, 539  
Production of boron nitride nanometric powder by plasma-enhanced chemical vapor deposition: microstructural characterization, 544  
Knock-on subplantation-induced formation of nanocrystalline c-BN with r.f. magnetron sputtering and r.f. argon ion plating, 548  
Dynamic properties and structure formation of boron and carbon nitrides, 1031  
Structural mechanisms of rhombohedral BN transformations into diamond-like phases, 1229
- Boron nitride film**  
Synthesis of cubic boron nitride thin films by ion-assisted pulsed laser deposition, 552
- Boron nitride films**
